Stay Safe Online: A Guide for College Students

1. **UPI PIN Privacy:** Never enter your UPI PIN to *receive* money; a PIN is only required to *send* or *pay* funds.
2. **Verify Requests:** Always double-check the "Request Money" notifications on apps like Google Pay or Phone pe to ensure you are not accidentally authorizing a debit.
3. **Two-Factor Authentication (2FA):** Enable 2FA on all academic and social media accounts to add a second layer of security beyond just a password.
4. **Strong Password Habits:** Use unique, complex passwords for every platform and avoid using your birthdate or name as a password.
5. **Public Wi-Fi Risks:** Avoid logging into bank accounts or sharing sensitive data while connected to free public Wi-Fi in cafes or stations.
6. **Oversharing on Social-Media:** Do not post photos of your ID cards, hall tickets, or hostel room numbers, as these can be used for identity theft.
7. **Phishing Awareness:** Do not click on suspicious links in emails or SMS that claim you have won a prize or that your account is blocked.
8. **App Permissions:** Regularly check your mobile app settings and revoke permissions for apps that don't need access to your contacts or location.
9. **Official Portals Only:** Use the official National Cyber Crime Portal (cybercrime.gov.in) to file a formal complaint for any online harassment or financial fraud.

10.**Update Software Regularly:** Keep your phone's OS and banking apps updated to ensure you have the latest security patches against ransomware and malware.

Emergency Reporting Channels:

- **National Cyber Crime Portal:** www.cybercrime.gov.in
- **National Helpline: 1930** (available 24/7)
